1 - Windows Basics.....	6	Undo & Redo	26
2 - Getting Started	8	Specifying points, lengths and angles.....	27
Toolbars.....	8	Repeating the last command.....	27
Workspace Tabs & Command Bar.....	10	6 - Positioning Aids	29
Status Bar.....	10	Entity-Snap (ESNAP).....	29
Work area colour.....	11	ESNAP Modes.....	29
Command Methods.....	11	Override ESNAPS.....	30
The Prompt Box & Working with no Command Bar.....	12	Snap & Grid.....	30
Starting a new drawing.....	12	POLAR snap.....	31
Setting up a work folder	13	Snap Angle for angled drawing elements.....	32
Installing our training exercise files	13	Drawing in 2D Isometric (using Snap options).....	32
Recommended Settings.....	14	7 - More Drawing Objects.....	35
Tips.....	15	Polyline.....	35
Basic operational methods	16	Commands that create Polylines.....	36
3 - Display Controls.....	17	Rectangle.....	36
Zoom & Pan.....	17	Polygon.....	37
PAN.....	18	Donut.....	37
Zoom and Pan with a Wheel Mouse.....	18	Ellipse.....	37
Mouse shortcuts.....	19	Spline.....	37
Other View Menu Items.....	19	Points & Point-Mode.....	38
Viewports	19	Measure & Divide.....	38
Named Views.....	19	8 - Modifying Drawing Objects.....	39
Redraw, Regen.....	19	Selecting Objects.....	39
VIEWRES.....	20	Erase.....	41
4 - Coordinates & Positioning.....	21	Move.....	41
The Coordinate System.....	21	Copy.....	41
Units.....	21	Rotate.....	42
Units Display Formats.....	22	Scale.....	42
Using other than mm for metric.....	22	Stretch.....	43
Ways of specifying Coordinates and lengths.....	22	Grip Editing.....	43
Absolute Coordinates.....	22	Deleting Objects.....	43
Relative Cartesian Coordinates.....	23	Grips on or off?.....	44
Relative Polar Coordinates.....	23	9 - Object Properties & Layers.....	45
LIMITS.....	23	Properties.....	45
5 - Basic Drawing Methods	24	1. Properties By-Layer.....	45
LINE.....	24	2. Properties By-Entity.....	45
CIRCLE.....	25	Layers.....	46
ARC	26	Layer Manager.....	48
		Colour.....	49

LineType.....	49	Redefining Internal Blocks.....	72
Lineweight.....	50	Block Libraries.....	72
10 - More Modify Commands.....	52	Block Libraries using progeCAD-Explorer.....	72
Parallel	52	Extra notes re using progeCAD Explorer for Blocks.....	74
Trim	53	To Create a Library Drawing –	74
Extend	54	14 - Dimensioning.....	76
Fillet	54	Dimension Styles & settings.....	76
Chamfer	55	Adjusting Dimension Style values for particular dimensions.....	78
Mirror	56	Placing dimensions.....	79
Array	57	Scaling of Dimensions.....	80
Rectangular Arrays.....	57	15 - Hatching.....	83
Polar (Circular) Arrays.....	57	16 - Printing	85
11 - Layout Mode	59	Three Style Table Methods.....	85
Three Modes.....	59	Print from Model or Layout?	85
Main techniques:.....	59	Printing setup.....	86
Making Viewport outlines invisible on plots:....	60	Style Tables.....	88
Turning off layers in particular viewports.....	60	Supplied Colour-based Print Style Tables.....	89
Setting up Paper Space Layouts.....	60	Creating new Colour-based Style Tables.....	90
Title Blocks	62	Using Named-Style Tables.....	91
ISO Sheet Sizes.....	63	My Suggested Method for New Users.....	91
12 - Text	64	17 – Making a Template.....	93
Text Styles.....	64	Our supplied Template.....	93
Two types of fonts:		Template drawings.....	94
SHX & TrueType.....	65	What to put in your Template.....	94
Single Line Text	66	How to create your own Template.....	94
Multi Line Text.....	67	Saving the template.....	97
Editing existing text.....	67	Location of Template drawings.....	97
13 - Blocks, XREFs & Libraries.....	69	Setting the default place to save your drawings..	98
Internal Blocks.....	69	Appendix 1:	
External Blocks.....	69	progeCAD on Windows-7 & Vista.....	99
External References (XREFs).....	69	Windows system organisation.....	99
Creating an Internal Block.....	70	Storage of work data.....	99
Making an External Block File (WBLOCK).....	70	Backup.....	100
Inserting Blocks.....	71		
Exploding Blocks.....	71
